

#### Devices/OS

- Palm
- Handspring Visor
- Casio Cassiopeia
- Compaq iPaq
- Hewlett-Packard Jornada
- Blackberry
- WAP devices
- Samsung Yopy
- Apple Newton

- Palm OS
- Windows CE/PPC
- Embedded Linux
- Newton

#### Mobile vs. Wireless

- Mobile = You can get information, then take it with you when you are in motion
- Wireless = You can get information while you are in motion

## Advantages of Mobility

- Adds flexibility to a lifestyle
  - Schedule
  - Contacts
- Keep content with you
- Tote large amounts of reference material

### **Advantages of Wireless**

- Real-time interaction with applications
- True on-demand eliminates need for forethought

## Applications and Content Available Today

- Yellow/White Pages
- Driving Directions
- Movie Listings
- Encyclopedias and dictionaries
- Financial Info
- Email and IM

- Amazon
- Yahoo!
- MSN
- Weather Channel
- ESPN
- AvantGo
- eBay

## Funky New Low Real Estate Space

- Test the platforms you want to support
- PDA browser support for HTML is inconsistent
- Akin to building for the Web of '93-'95
- This "HTML Lite" is almost HTML 3.0, but not quite.
- Best use of images

## Wireless PBS AvantGo channel

- Sign-up Process
- Content
- Back End

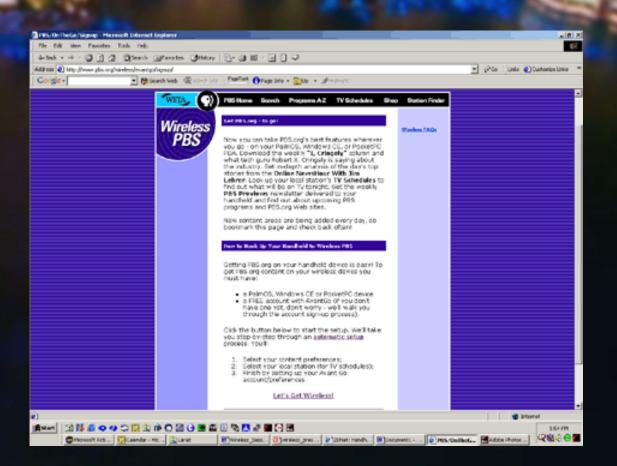

### Sign-up Process

- Orientation
- Select Content
- Choose Favorite Local Member Station
- Create AvantGo Account or Confirm changes to existing AvantGo account
- Return to PBS.org

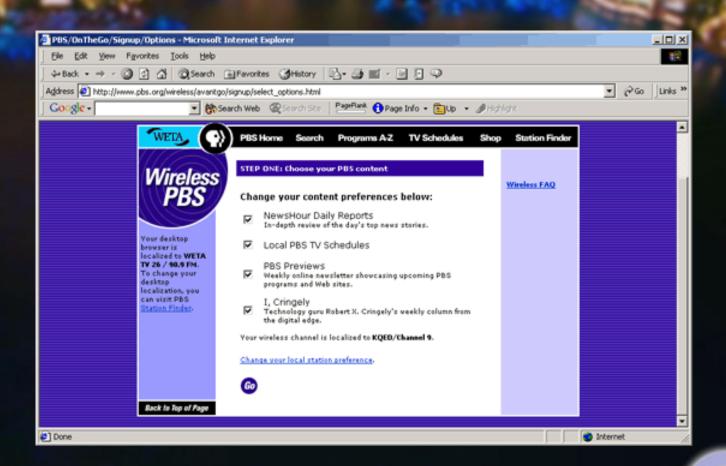

## Sign-up: Orientation

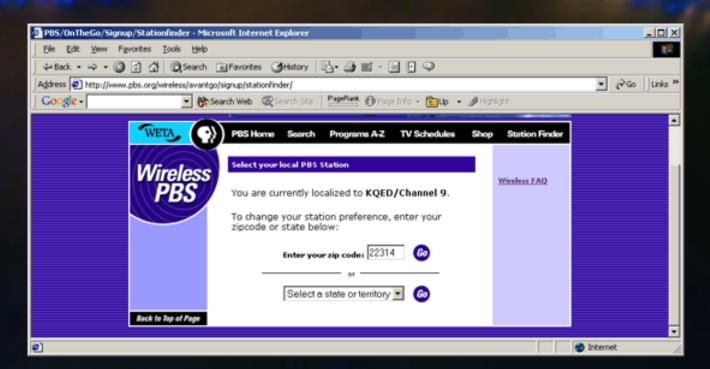

## Sign-up: Select Content

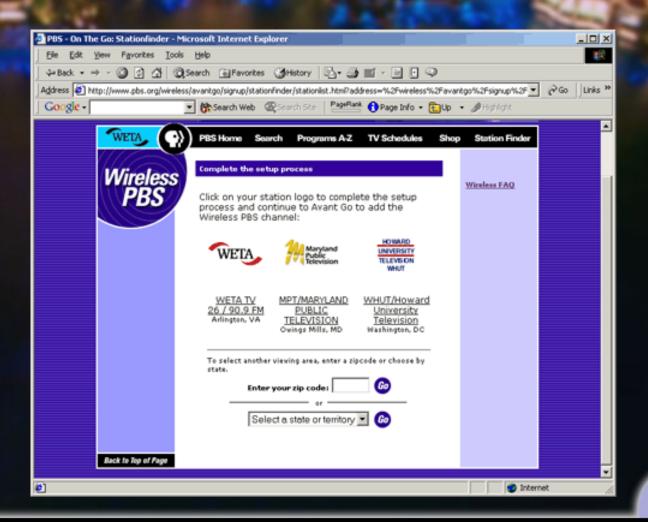

# Sign-up: What Area of the Country?

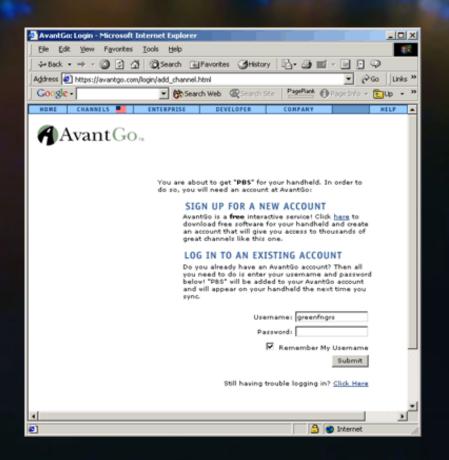

## Sign-up: Choose Station

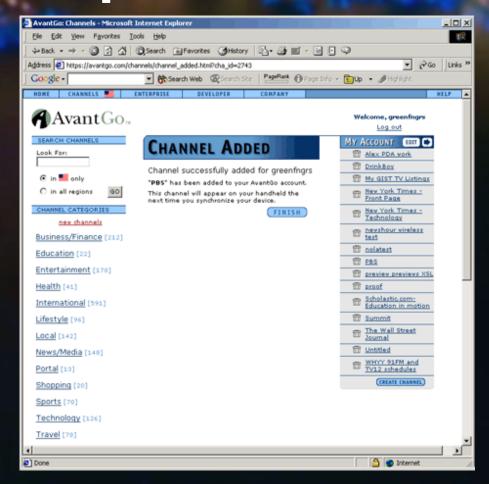

### Sign-up: AvantGo

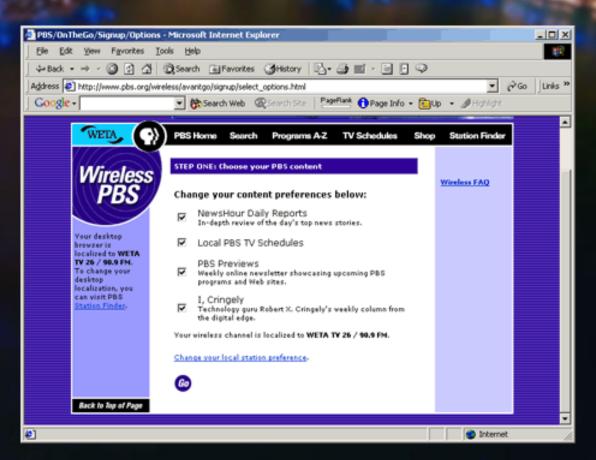

#### Sign-up: AvantGo Finish

## Sign-up: Return to PBS.org

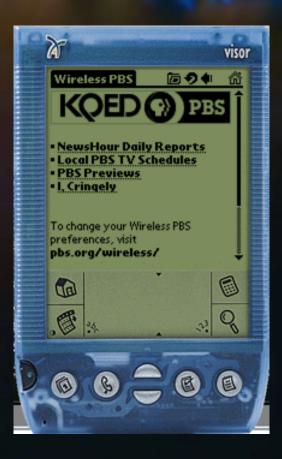

### Wireless PBS Content

- NewsHour Previews and Reports
- Local TV Schedules
- PBS Previews
- I, Cringely
- Other?

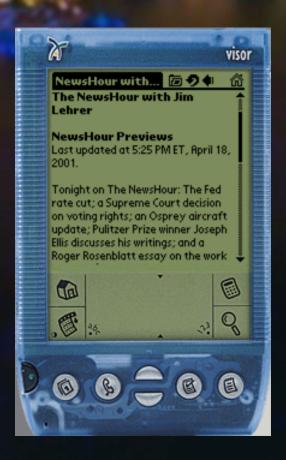

#### Wireless PBS

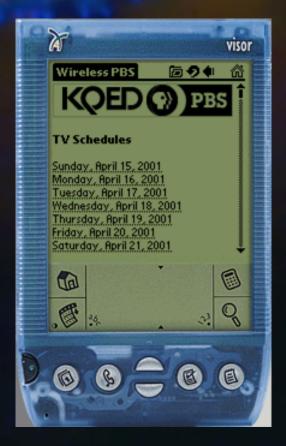

### Wireless PBS: NewsHour

## Wireless PBS: TV Schedules

#### Wireless PBS: Previews

## Wireless PBS: I, Cringely

#### **Local Content**

- Local Community Events
- Local News
- Other Member Station Content?

## Publishing of PBS Wireless Content

- Form Based submission using XML/XSL
  - Ease of Management
  - XML Parser, XSL interpreter for Solaris or Linux
  - XSL translations

- Template based submission of HTML
  - More flexibility for station
  - Less manageable
  - File sizes (how to control given device storage limitations)

#### **A Wireless Future**

- Digital Terrestrial Television
  - DTV signal has room for large amounts of data
    - 19.39 Mbps
      - 1 HD Channel + general data
      - 4 SD Channels + data for each + general data
    - SAF DTV/iTV trials sending 500 Kbps
      - Standard Definition 4:3 / 4-way multicast
    - Space for data can grow with encoder technology
  - Transition frees 'analog' spectrum for data applications/devices

- Digital Terrestrial iTV (continued)
  - Types of Data
    - Data casting (program independent)
      - Commercial payloads
      - Mission-critical corporate data
    - Enhanced programming (program synchronous)
  - Robust applications with web-like functionality
    - Based on web technologies (HTML, JavaScript, etc)
    - Movement from HTML toward XHTML to XML
  - Unidirectional / move to bi-directional
  - Reception devices
    - Set Top Boxes
    - Desktop PCs
    - Handheld PCs
    - Tablets

#### Wireless PDAs

- Two-way connectivity paves way to robust, real-time interactive applications
- User experience/content converges with web
- Ultimately devices merely another access device to singular content

- Future wireless devices
  - PDAs to PADs (Personal Access Devices)
  - LAWN Tablets
    - Schools
    - Work environments
  - PrAWN
    - Banks
    - Secure environments
  - Dick Tracy wristwatch
